PROFESSIONAL EXPERIENCE

Melange Digital

Full Stack Web Developer - | August 2023 - Present | Remote

- Developed a client's website consisting of **40+ pages** having different complex functionalities including integration of **Indian Market Stock Exchange** data using Google Sheets data APIs through Google Cloud Console
- Developed the front-end of a **15+** pages **AI web application** which has different kinds of media upload features and 3D model rendering, 360 degree view images, panorama view and image and video filters.
- Developed a landing page for a Finserv company using **HTML, CSS,** and **JavaScript** with **Bootstrap** integration. The page successfully managed three live events in December 2023, attracting over 2,000 request queries within a month.
- Developed another **7+** different landing pages in **ReactJs** - **Tailwind** and HTML, CSS, and JavaScript for internal Melange Digital projects which include their involvement in auction in Singapore and other campaigns for better reach.

RELEVANT PROJECTS

Portfolio Website | Rahul Kumar

ReactJs, Tailwind and Nodemailer

- This is my PortFolio website using the base build of ReactJS and I created its styles using Tailwind CSS and also I used Nodemailer to get the emails to my email address if someone fills up the form.
- It is responsive for mobile users also, and has a hamburger menu in mobile phones

Ecomerce Website | Ebic Electric

ReactJs, Tailwind and Nodemailer

- I developed an e-commerce website for the frontend using ReactJS and Tailwind CSS. Additionally, I utilized Email.js to capture and forward form information to my email address.

EDUCATION

Phonics Group of Institution | Roorkee, Uttarakhand | 2018 - 2022

Bachelor of Computer Science - Software Engineering
